.Net Core | GraphQL | WCF |
MVC

WORK EXPERIENCE

• TECHNICAL LEAD

Tech Mahindra / Zürich / Nov 2024 – present

FUND CLIENT REPORTING - UBS (CREDIT SUISSE MIGRATION)
FCR platform for UBS investment management clients, responsible for portfolio valuation and regulatory client reporting. The system calculates Net Asset Value (NAV) for client portfolios on configurable frequencies (daily, weekly, monthly) and generates automated reports used for portfolio tracking, performance analysis and fee calculation. A secure web-based portal allows configuration, report access and distribution to end clients.

RESPONSIBILITIES

- Contributed to the large-scale migration of applications from Credit Suisse to UBS supporting both application development and end-to-end release activities in a regulated banking environment.
- Owned and managed CI/CD pipelines using GitLab CI/CD, and supported controlled deployments and releases using REX.
- Led release management activities including release planning, environment readiness, deployment coordination and post-release validation to ensure seamless production transitions.
- Created and maintained comprehensive troubleshooting guidelines for CI/CD pipelines and release processes enabling faster issue resolution.

• SENIOR SOFTWARE ENGINEER

EF Information Systems / Zürich / Apr 2022 – present

CAMPUS CONNECT

The essential mobile app for EF International Language campus students. Manage profiles, track progress, access schedules, make payments, and join activities seamlessly. Powered by integrated backend technology for real-time data management.

CUSTOMER PORTAL

Customer Portal, a React based web application, extends the functionalities of our mobile app, empowering users with seamless access to features. Students can efficiently take tests, view invoice details and process payments, enhancing their overall experience.

R E S P O N S I B I L I T I E S

- Led the development of key features overseeing the design and implementation.
- Integrated backend systems to ensure seamless data flow between mobile/web applications and backend services.
- Designed and implemented a CI/CD pipeline using GitHub Actions to automate the deployment process, reducing deployment time
- Collaborated with stakeholders to gather requirements and ensure alignment with business goals.
- Spearheaded the team as Scrum Master, orchestrating Agile ceremonies and fostering collaboration to deliver software solutions aligned with business needs.
- Implemented the payment module with ADYEN payment gateway.

- SENIOR SOFTWARE ENGINEER

EF Information Systems / Bengaluru / Oct 2016 -Apr 2022

M Y S T A F F

Designed to streamline operations for EF staffs and ambassadors, My Staff portal automates range of tasks, simplifying day-to-day activities. This portal efficiently manages student-redeemable awards accrued through points accumulation. Additionally, it tracks and maintains records of reward requests ensuring accurate allocation and historical tracking.

- SOFTWARE ENGINEER

EF Information Systems / Bengaluru / Dec 2014 - Oct 2016

H O S T F A M I L Y

Host family serves as a comprehensive portal, offering essential information for both host families and arriving students to familiarize themselves with one another. It serves as a bridge for host families to connect with international students, fostering a platform for cultural exchange and language learning.

- SOFTWARE DEVELOPER

Samartha Info Solutions / Bengaluru / Feb 2011 - Nov 2014

A D V A N C E D F A Q

Advance FAQ serves as a dynamic document management system and search tool, catering to users seeking information on tools utilized within the client's firm. Users can upload or search documents by keywords, titles, or content. The system suggests keywords for document mapping and features a dashboard displaying top-ranked documents based on search frequency.
